Chapter 1—Nutrition/Metabolism

Sepsis and Endotoxemia Increase Expression of IL-1 and IL-6 in the Central Nervous System (CNS) 1
Tory A. Meyer, MD, Jingjing Wang, MD, Gregory M. Tiao, MD, Cora K. Ogle, PhD, Josef E. Fischer, MD, FACS, and Per-Olof Hasselgren, MD, FACS

Sepsis-induced Increase in Brain Endogenous Morphine: Regulator of Muscle Proteolysis 4
Patricia E. Molina, MD, PhD, Greg Tiao, MD, Jeroen Meijerink, MD, PhD, Per-Olof Hasselgren, MD, FACS, and Naji N. Abumrad, MD, FACS

The Anorexia and Cachexia of Inflammation Can Be Explained by CNS Production of Ciliary Neurotrophic Factor (CNTF) 7
Atsushi Kaibara, MD, N. Joseph Espat, MD, Troy Auffenberg, BS, Amer Abouhamze, BS, Satye Kalra, PhD, David Martin, PhD, Jack Gauldie, PhD, Lyle L. Moldawer, PhD, and Edward M. Copeland III, MD, FACS

Sepsis Increases Proteasome-dependent Proteolysis and mRNA Levels for the Proteasome Subunit RC3 in Skeletal Muscle 10
Gregory M. Tiao, MD, Julie Fagan, PhD, Michael Lieberman, PhD, Josef Fischer, MD, FACS, and Per-Olof Hasselgren, MD, FACS

Peptide Aldehyde Inhibitors of the Proteasome Reduce the Accelerated Proteolysis in Atrophying Skeletal Muscles 12
Nicholas E. Tawa, Jr., MD, PhD, Richard Odessey, PhD, and Alfred L. Goldberg, PhD

Growth Hormone and the Combination of Growth Hormone Plus Insulin Improve Protein Kinetics in Postoperative Cancer Patients 15
Russell S. Berman, MD, Lawrence E. Harrison, MD, David B. Pearlstone, MD, Michael Burt, MD, PhD, FACS, and Murray F. Brennan, MD, FACS

Prostaglandin D_2 Regulates the Glutamine/Glutamate Shuttle in Human Vascular Endothelium 18
Ming Pan, MD, PhD, Masafumi Wasa, MD, and Wiley W. Souba, MD, ScD, FACS

Influence of Glutamine-supplemented TPN on in Vitro and in Vivo Responses to Endotoxin 21
Carla C. Braxton, MD, Susette M. Coyle, RN, MS, Tom van der Poll, MD, Marc Roth, RPh, Steve E. Calvano, PhD, and Stephen F. Lowry, MD, FACS

Lipid Supplementation Increases Norepinephrine Excretion and Bacterial Translocation in Parenterally Fed Rats 23
Kevin M. Johnson, MD, Richard M. Garcia, BS, Margaret Heitkemper, PhD, and W. Scott Helton, MD

Neural/Endocrine Factors Enhance the Expression of Inducible Nitric Oxide Synthase in Rat Splenocytes 25
Walter Scott, MD, Melissa Hayden, BA, Amy C. Degnim, MD, Kimberly Maslonek, BS, Donald Lysle, PhD, and Don K. Nakayama, MD, FACS

Mechanisms of Arginine and Lysine Immune-enhancing Activity .. 27
Akira Niijima, MD, Tad Renvyle, MS, and Michael M. Meguid, MD, PhD, FACS

Early Changes in Sodium Distribution Induced by Sepsis 30
Tadashi Mitsuo, MD, Jan Rounds, BS, Jonathan Rose, BA, Douglas W. Wilmore, MD, FACS, and Danny O. Jacobs, MD, FACS

Chapter II—Inflammatory Cells

Reduced Polymorphonuclear Neutrophil (PMN) Exudation in Patients with the Systemic Inflammatory Response Syndrome (SIRS) 32
Najma Ayesha Ahmed, MD, PhD, Betty Giannias, BSc, and Nicolas Velos Christou, MD, PhD, FACS

The Effects of Aortic Cross Clamping on Neutrophil Integrin CD11b and Cytokine Release 34
Gary E. Hill, MD, Paul J. Mihalakakos, MD, John R. Spurzem, MD, Brian G. Halloran, MD, and B. Timothy Baxter, MD, FACS

Inhibition of TNF-α, But Not E-Selectin and P-Selectin, Attenuates Lung and Peritoneal Cavity Neutrophil Accumulation in a Mouse Cecal Ligation and Puncture Model 37
Jeffrey H. Pruitt, MD, Paul D. Edwards, MD, M. Burress Welborn III, MD, Edward M. Copeland III, MD, FACS, and Lyle L. Moldawer, PhD

The Ingestion of Bacteria by Neutrophils Induces Apoptosis through an Oxygen-dependent Mechanism 39
R. William G. Watson, PhD, H. Paul Redmond, FRCSI, Jiang Huai Wang, PhD, Claire Condron, BSc, and David Bouchier-Hayes, FRCSI

Scavenger Receptor Blockade Augments LPS-induced TNF Production by Alveolar Macrophages 41
Cynthia Mendez, MD, Iris Garcia, BS, and Ronald V. Maier, MD, FACS

CD14 Expression in Peripheral Blood Monocytes following Hemorrhage 44
Fiemu E. Nwariaku, MD, Patricia J. Sikes, MS, Kendra L. McIntyre, BS, Ellis Lightfoot, BS, and William J. Mileski, MD, FACS

Alterations in CD14 Expression on Human Monocytes after Incubation with Biological Response Modifiers 47
Michael Heinzelmann, MD, Sarah Appel Gardner, BS, Anne K. Huang, MD, and Mark Mercer-Jones, FRCS

Antioxidant Inhibition of Mast Cell-induced Macrophage Activation 50
Alan P. B. Dackiw, MD, Avery B. Nathens, MD, John C. Marshall, MD, FRCS(C), FACS, and Ori D. Rotstein, MD, FRCS(C), FACS

Altered Transcriptional Regulation of IL-2 after Burn Injury 52
Criostoir B. O'Suilleabhain, MB, FRCSI, Mary L. Rodrick, PhD, Alan F. Horgan, MD, FRCSI, Inna B. Saporoschetz, BS, Jane M. Doherty, MA, John A. Mannick, MD, FACS, and James A. Lederer, MS, PhD

Inhaled Nitric Oxide Prevents Pulmonary Endothelial Dysfunction in Acute Lung Injury 55
Randall S. Friese, MD, David A. Fullerton, MD, Robert C. McIntyre, Jr., MD, Jeanette Agrafojo, BS, Ani Banerjee, PhD, and Alden H. Harken, MD

Differential Cytokine Secretion by Wound Fibroblasts Compared to Normal Fibroblasts in Response to LPS 58
Ernest E. Beecherl, MD, Sandra Hill, BS, and Thomas J. Fahey III, MD

Eosinophilia as a Marker for Acute Adrenal Insufficiency in the Surgical Intensive Care Unit 60
Michael Angelis, MD, Mihae Yu, MD, FACS, Danny Takanishi, MD, Nahidh W. M. A. Hasaniya, MD, and Michael R. Brown, MD, PhD

Chapter III—Sepsis and Shock

Active But Not Passive Immunization Protects against Gram-negative Bacterial Infection 63
Peter S. Dahlberg, MD, Richard J. Battafarano, MD, Robert D. Acton, MD, Mark E. Uknis, MD, Craig R. Ratz, BS, Jennifer W. Johnston, BS, and David L. Dunn, MD, PhD, FACS

Females in Proestrus State Tolerate Sepsis Better than Males 65
René Zellweger, MD, Alfred Ayala, PhD, Susan Stein, DVM, Catherine M. DeMaso, MS, and Irshad H. Chaudry, PhD

Cardiac Adrenergic Receptor Down-Regulation in Endotoxemia ... 67
Abdul Qadir, MBBS, Tohru Utsunomiya, MD, Siva R. Chavali, PhD, and R. Armour Forse, MD, PhD, FACS

A Selective Inhibitor of Inducible Nitric Oxide Synthase Prolongs Survival in a Rat Model of *Escherichia coli* Peritonitis 69
Jonathan S. Aranow, MD, Jing Zhuang, MD, Vera Larkin, MEd, and Mitchell P. Fink, MD, FACS

Delayed Treatment with EUK-8, a Novel Synthetic Superoxide Dismutase (SOD) and Catalase (CAT) Mimetic, Ameliorates Acute Lung Injury in Endotoxemic Pigs 72
Pamela K. Gonzalez, BA, Jing Zhuang, MD, Susan R. Doctrow, PhD, Bernard Malfroy, PhD, Marianne Smith, MS, Michael J. Menconi, PhD, and Mitchell P. Fink, MD, FACS

Early Impaired Oxygen Consumption due to Supply-independent Mitochondrial Dysfunction Occurs in Patients Who Develop MOF ... 74
Frederick A. Moore, MD, FACS, James B. Haenel, RRT, Ernest E. Moore, MD, FACS, Barbara L. Gallea, RN, Joseph P. Ortner, BA, and Charles B. Cairns, MD

Perfusion Patterns in Uncontrolled Hemorrhagic Shock and Limited Resuscitation 76
William B. Inabnet, MD, John J. Fildes, MD, FACS, and John A. Barrett, MD, FACS

The Potential Role of Elevated Intracellular Calcium in the Development of Postburn Cardiac Dysfunction 79
D. Jean White, MS, David Maass, BS, Billy Sanders, BS, and Jureta W. Horton, PhD

HSP-72 Hepatic mRNA and Protein Are Induced by Hemorrhagic Shock and Resuscitation, But Not by Shock Alone 82
Edward Kelly, MD, Nishit Shah, MD, Nathan N. Morgan, BS, Andrew B. Peitzman, MD, FACS, and Timothy R. Billiar, MD

Immunosuppression following Hemorrhage Is Reduced by Hypertonic Saline Resuscitation 84
Raul Coimbra, MD, Wolfgang G. Junger, PhD, David B. Hoyt, MD, FACS, Forrest C. Liu, MD, William H. Loomis, BS, Michael F. Evers, BS, and Richard E. Davis, BA

Mechanism of the Beneficial Effects of a Novel Nonanticoagulant Heparin (GM1892) following Hemorrhagic Shock: Down-Regulation of Proinflammatory Cytokine (TNF and IL-6) Production 87
John P. Kepros, MD, Ping Wang, MD, Mary H. Morrison, MS, and Irshad H. Chaudry, PhD

Oral L-2-OXO-4-Thiazolidine Carboxylate (OTZ) Administration Reduces Bacterial Translocation after Abdominal Radiation 89
Sarah L. Blair, MD, D. Michael Rose, MD, Steven N. Hochwald, MD, Sonu Sachar, BS, and Michael Burt, MD, PhD

Chapter IV—Cytokines/Nitric Oxide

Cytokine mRNA Expression and Endotoxin Levels in Germ-free and Germ-bearing Rat Lungs following Hemorrhagic Shock 92
Gregory Simonian, MD, Michael Condon, PhD, Benjamin Rush, MD, Thomas Lysz, PhD, and Thomas Murphy, MS

Intestinal Ischemia–Reperfusion (IIR) Up-Regulates Pulmonary Thromboxane Synthetase Content 94
Kevin M. Kadesky, MD, Richard H. Turnage, MD, Lori Bartula, BS, and Stuart I. Myers, MD

Thromboxane A_2 Receptor Antagonism Attenuates Pulmonary Microvascular Leak following Intestinal Ischemia/Reperfusion 96
Mary B. Carter, MD, Mark A. Wilson, MD, FACS, William B. Wead, PhD, and R. Neal Garrison, MD, FACS

Cytokine Regulation by a β-Adrenergic Agonist Improves Mortality in Mice with Severe Endotoxicosis 99
W. William Zhong, MD, MS, Sambasiva R. Chavali, PhD, Tohru Utsunomiya, MD, and R. Armour Forse, MD, PhD, FACS

Effect of Epinephrine on Cytokine Release during Human Endotoxemia 102
Tom van der Poll, MD, Carla C. Braxton, MD, Susette M. Coyle, RN, Karen Barbosa, Ashwini Kumar, Steve E. Calvano, PhD, and Stephen F. Lowry, MD, FACS

Nitrosothiols: Long-acting Intermediates of Nitric Oxide 103
Robert K. Goldman, MD, Angelo A. Vlessis, MD, PhD, and Donald D. Trunkey, MD, FACS

Direct Evidence for Disruption of Mitochondrial ATP Synthesis in Porcine Gram-negative Sepsis and Evaluation of Pretreatment with the Nitric Oxide Synthase Inhibitor Aminoguanidine 106
Thomas J. Lomis, MD, Sridhar Chalasani, MD, Corydon W. Siffring, MD, John A. Manubay, MD, Seth Yank, John S. Monk, MD, FACS, Baltazar Reynafarje, MD, PhD, and Jonathan E. Rhoads, Jr., MD, FACS

A Novel Tetravalent Guanylhydrazone Compound That Inhibits Inflammation and Macrophage Production of TNF 109
Carla Cerami, MD, Marina Bianchi, MD, Ona Bloom, BS, Christine Metz, PhD, Anthony J. Tortolani, MD, Anthony Cerami, PhD, and Kevin J. Tracey, MD

Endotoxin-induced Nitric Oxide Production Impairs Cardiac Contractility and Energetics 112
Koh Takeuchi, MD, Francis McGowan, MD, Hung Cao-Danh, PhD, Percival Buenaventura, MD, Elena Simplaceneau, MS, Shoichi Takahashi, MD, Paul Glynn, PhD, and Pedro J. del Nido, MD, FACS

Arginine Improves Cardiac Function in Sepsis 114
Gregory J. England, MD, Ronald C. Hill, MD, FACS, Gregory A. Timberlake, MD, FACS, and Yvonne L. Shahan, MS

The Nitric Oxide Donor Molsidomine Decreases the Production of TNF, IL-1, and IL-6 in the Perfused Mouse Liver after Endotoxin 116
Norman H. Kumins, MD, Julia L. Hunt, BS, Richard L. Gamelli, MD, FACS, and James P. Filkins, PhD

Endogenous Nitric Oxide (NO) Synthesis Protects Liver Cells from H_2O_2-induced Injury 119
James M. Wong, MD, Edith Tzeng, MD, Andreas K. Nussler, PhD, and Timothy R. Billiar, MD

Chapter V—Alimentary Tract

IGF-I and EGF Stimulate DNA Synthesis in Three-Dimensional Esophageal Explants via Tyrosine Kinase-dependent Pathways ... 122
Marcin T. Tchorzewski, MD, Faisal G. Qureshi, MD, Mark D. Duncan, MD, Shmuel Batzri, PhD, and John W. Harmon, MD, FACS

Gastrin-17 Is a Potent Protective Agent against Gastric Mucosal Injury ... 125
David W. Mercer, MD, James M. Cross, MD, Gregory S. Smith, PhD, and Thomas A. Miller, MD, FACS

Evidence for a Novel K^+/HCO_3^- Cotransporter in Gastric Oxyntic Cells ... 127
Mary E. Klingensmith, MD, Audrey E. Gadacz, BE, and David I. Soybel, MD

Reversible Bile Acid-induced Hypercalcemia and Respiratory Impairment in Gastric Epithelial Cells ... 129
P. Kurt Bamberger, MD, Shmuel Batzri, PhD, Mark Molloy, MD, Mark Duncan, MD, and John W. Harmon, MD, FACS

Role of Angiotensin-converting Enzyme in Gastric Microcirculation under Normal Conditions and during Hemorrhagic Shock ... 132
Qiang Zhang, MD, John G. Wood, PhD, and Laurence Y. Cheung, MD, FACS

Pituitary Adenylate Cyclase-activating Peptide: Signaling Mechanisms in Pancreatic Acini ... 134
Beth C. Kimball, MD, and Michael W. Mulholland, MD, PhD, FACS

Somatostatin-Receptor Status of Pancreatic Adenocarcinoma Predicts Response to Somatostatin Therapy in Vitro and in Vivo 137
William E. Fisher, MD, Laszlo G. Boros, MD, A. Kirk Tamaddon, BS, M. Sue O'Dorisio, MD, PhD, Thomas M. O'Dorisio, MD, and William J. Schirmer, MD

Lysis of Pancreatic Cancer Cells by Tumor-specific T Cells Is Associated with Tumor Cell Expression of HER2/neu 140
Matthias Peiper, MD, David C. Linehan, MD, Eric Ganguly, Cara C. Douville, Peter S. Goedegebuure, PhD, and Timothy J. Eberlein, MD, FACS

Inhibition of Nitric Oxide Synthesis Increases the Severity of Acute Pancreatitis 142
Mark T. Toyama, MD, Amy M. Kusske, MD, Ameet G. Patel, FRCS, Peter U. Reber, MD, Howard A. Reber, MD, and Stanley W. Ashley, MD

Endotoxin-induced ICAM-1 Up-Regulation on Endothelium Is Mediated via PLA_2 Activity 144
Carlton C. Barnett, Jr., MD, Ernest E. Moore, MD, FACS, Frederick A. Moore, MD, FACS, Virginia S. Carl, MS, and Walter L. Biffl, MD

Carbon Dioxide Inhibits Peritoneal Macrophage Cytokine Production: A Mechanism for the Lack of Host Inflammatory Symptoms after Laparoscopic Surgery? 147
Michael A. West, MD, PhD, FACS, and Janet Bellingham, BS

Glucocorticoids Exert a Permissive Effect on Cytokine-stimulated Glutamine Transport in Cultured Hepatocytes 150
Craig P. Fischer, MD, MPH, Barrie P. Bode, PhD, and Wiley W. Souba, MD, ScD, FACS

Insights into the Mechanism of Increased Kupffer Cell Cytokine Release and Cytotoxicity in Response to Hemorrhage: Increased Expression of HSP72 153
David M. Kam, MD, Alfred Ayala, PhD, and Irshad H. Chaudry, PhD

Hepatic Glucose Production after Liver Resection 155
Kelly A. Kogut, MD, L. Wiley Nifong, MD, Mary Jo Witt, BA, and David A. Krusch, MD, FACS

Alterations in Hepatic and Skeletal Muscle Energetics during Sepsis Are Associated with Endotoxemia and Serum Complement Activation 158
Ryusuke Denno, MD, Jan D. Rounds, BS, Tadashi Mitsuo, MD, Colin Cook, PhD, Mary L. Rodrick, PhD, John A. Mannick, MD, Douglas W. Wilmore, MD, FACS, and Danny O. Jacobs, MD, FACS

The Effect of Cyclosporine A Pretreatment on Porcine Hepatic Ischemia Followed by Reperfusion 161
Renata Fabia, MD, PhD, Marlon F. Levy, MD, Denise Travis, DVM, Robert M. Goldstein, MD, Bo S. Husberg, MD, PhD, and Goran B. Klintmalm, MD, PhD

Interferon-Gamma Protects against Hepatectomy-enhanced Tumor Growth by Increasing Kupffer Cell Tumoricidal Activity 164
Howard M. Karpoff, MD, Cindy Tung, BA, Bruce Ng, MS, Jennifer Ellis, MD, Tracey Weigel, MD, Murray Brennan, MD, and Yuman Fong, MD

HSV-mediated Production of IL-2-secreting Hepatoma Vaccines That Confer Specific Immunity and Protection against Subsequent Tumor Challenge 166
Tracey Weigel, MD, Howard Federoff, MD, PhD, Michael Brownlee, MD, Bruce Ng, MS, Cindy Tung, BA, Howard Karpoff, MD, Murray Brennan, MD, and Yuman Fong, MD

Ex Vivo Plasma Perfusion of a Bioartificial Liver Loaded with Matrix-induced Liver Cell Aggregates (MILCA) 168
Jacek Rozga, MD, PhD, Steve Chen, MD, Lawrence B. Kong, MD, Chih-Chi Wang, MD, Susuma Eguchi, MD, and Achilles A. Demetriou, MD, PhD, FACS

Increased Acyl CoA:sn-Glycerol-3-Phosphate Acyltransferase Activity in Gallbladder Mucosa in the Cholesterol-fed Prairie Dog 171
Brian E. Harvey, MD, PhD, Attila Nakeeb, MD, Karen Fox-Talbot, MA, Stephen A. Barnes, MD, Sean M. Johnston, FRCSI, Pamela A. Lipsett, MD, FACS, Henry A. Pitt, MD, FACS, and Keith D. Lillemoe, MD, FACS

An 84-kDa Biliary Nonmucin Glycoprotein Is a Potent Cholesterol Crystal Nucleator 173
Sean M. Johnston, FRCSI, Pamela A. Lipsett, MD, FACS, Karen M. Fox-Talbot, MA, Keith D. Lillemoe, MD, FACS, and Henry A. Pitt, MD, FACS

Decreased Splenocyte Proliferation and Cytokine Production after Bile Duct Ligation in Rats 175
Ting Liu, MD, Xiao He, MD, Donna M. Murasko, PhD, and Kim U. Kahng, MD, FACS

Glutamine Regulates Cell Cycle Protein Expression for Intestinal Cell Growth 177
James R. Upp, Jr., MD, FACS, Tien C. Ko, MD, Courtney M. Townsend, Jr., MD, FACS, James C. Thompson, MD, FACS, and R. Daniel Beauchamp, MD, FACS

PYY Selectively Promotes Expression of the Colonocytic Phenotype and Stimulates Proliferation of a Human Intestinal Epithelial Stem Cell Model 179
Susan A. Sgambati, MD, Gregory A. Turowski, MD, PhD, and Marc D. Basson, MD, PhD

Intracellular Regulation of Intestinal Cell Proliferation: A Study Using Microinjection Technology 182
Tien C. Ko, MD, Fuming Pan, MS, David B. Brown, PhD, E. Aubrey Thompson, PhD, and R. Daniel Beauchamp, MD, FACS

Intraluminal Delivery of IGF-I Augments Postresection Intestinal Adaptation without Systemic Absorption 184
William T. Adamson, MD, John I. Lew, AB, Robert J. Smith, MD, and John L. Rombeau, MD, FACS

Epidermal Growth Factor Enhances Small Intestinal Absorption 188
Anthony J. Rongione, MD, Carson D. Liu, MD, Edward E. Whang, MD, James C. Y. Dunn, MD, PhD, Todd R. Newton, BS, Michael J. Zinner, MD, FACS, Stanley W. Ashley, MD, FACS, and David W. McFadden, MD, FACS

The Anti-Ischemic Role for Na^+–H^+ Exchange Inhibition in Isolated Small Bowel Villi 191
Umer M. Darr, MD, Reginald Abraham, MD, and John Geibel, MD, DSc

Studies in Transgenic Mice Reveal That p53 Is Required for SV40 T Antigen and Human K-ras^{Val12} to Cooperate to Produce Dysplasia in Villus-associated Intestinal Enterocytes 193
Craig M. Coopersmith, MD, Chitra Chandrasekaran, BS, and Jeffrey I. Gordon, MD

Functional Changes in Enteric Smooth Muscle Contractile Activity after Small Bowel Transplantation 196
Michel M. Murr, MD, Virginia M. Miller, PhD, and Michael G. Sarr, MD

Developmental Expression of Neurotensin Is Mediated by Changes in Gene Transcription 198
B. Mark Evers, MD, FACS, John A. Ehrenfried, MD, Xiaofu Wang, Courtney M. Townsend, Jr., MD, FACS, and James C. Thompson, MD, FACS

Inhibition of Intestinal Epithelial Chloride Secretion by a Novel Membrane-permeant Stabilizer of Actin Microfilaments 201
Jeffrey B. Matthews, MD, FACS, and Jeremy A. Smith, BS

Membrane and Genomic Mechanisms for Aldosterone Effect in Human Colon 203
Donal D. Maguire, MB,
Gerald C. O'Sullivan, MB, MSc, MCh, FRCS, and
Brian J. Harvey, PhD, DSc

Endothelial Cell Invasion Is Enhanced by the Urokinase-Type Plasminogen Activator System in Colon Cancer Cell Lines 206
Mark S. Talamonti, MD, Karen A. Kozlowski, PhD,
Hau C. Kwaan, MD, and David L. Nahrwold, MD, FACS

Chapter VI—Cardiothoracic

Myocardial Stunning: Changes in Cardiac Gene Expression after Global Ischemia and Reperfusion 209
John W. C. Entwistle III, MD, Laura J. Graham, LVT,
Emma R. Jakoi, PhD, and Andrew S. Wechsler, MD, FACS

Evidence That Cardioplegia Enhances Functional Recovery in the Senescent Myocardium through an RNA-dependent Mechanism 211
Hitoshi Matsuda, MD, James D. McCully, PhD,
Narelle C. Hadlow, MD, Irvin B. Krukenkamp, MD, and
Sidney Levitsky, MD, FACS

Functional and Metabolic Effects of Regional Ischemic Preconditioning on Global Myocardial Ischemia 214
Douglas Baldwin, MD, Edward McFalls, MD, PhD,
Stephen Archer, MD, Diane Jaimes, BS, Peg Fashingbauer, BS,
Tim Nemzek, MS, CCP, Jennifer Purrington, BSN, and
Herbert Ward, MD, PhD, FACS

Specific Isoforms of Protein Kinase C Are Associated with Limitation of Ischemic Acidosis in the Preconditioned Heart 216
Thomas F. Rehring, MD, Randall S. Friese, MD, Joseph C. Cleveland, Jr., MD, Anirban Banerjee, PhD, and Alden H. Harken, MD

Phospholipase C and Intracellular Signaling in the Ischemic Heart 219
Percival Buenaventura, MD, Hung Cao-Danh, PhD, Shoichi Takahashi, MD, Paul Glynn, PhD, Francis McGowan, MD, and Pedro del Nido, MD, FACS

Attenuation of Myocardial Stunning by a Novel 21-Aminosteroid 221
Quanmei Deng, MD, Carol Lawton, Hani Sabbah, PhD, and Norman A. Silverman, MD, FACS

Persistent Electrical Activity during Hyperpolarized Cardiac Arrest Does Not Affect Postischemic Myocardial Recovery 222
Steven L. Maskal, MD, Charles E. Fields, MD, Neri M. Cohen, MD, PhD, and Ralph J. Damiano, Jr., MD, FACS

Pinacidil-induced Hyperpolarized Cold Blood Cardioplegia: A Novel Myoprotective Strategy 224
Romas J. Kirvaitis, MD, Irvin B. Krukenkamp, MD, Emad A. Bukhari, MD, Glenn R. Gaudette, MSc, Tsukasa Miyatake, MD, and Sidney Levitsky, MD, FACS

Pyruvate Improves Myocardial Tolerance to Ischemia by an Antioxidant Mechanism: Direct Evidence from Chemiluminescence Studies 227
Juan A. Crestanello, MD, David M. Lingle, MD, John Millili, MD, FACS, and Glenn J. Whitman, MD, FACS

Milrinone Improves Contractility in Stunned Myocardium without Increasing Oxygen Demand 230
James L. Johnson II, MD, Robert D. Lasley, PhD, Zhangdong Zhou, MD, MS, and Robert M. Mentzer, Jr., MD, FACS

L-Arginine Reduces the Endothelial Inflammatory Response and Myocardial Stunning following Ischemia/Reperfusion 233
Daniel T. Engelman, MD, Masazumi Watanabe, MD, Nilanjana Maulik, PhD, Richard M. Engelman, MD, FACS, John A. Rousou, MD, FACS, Joseph E. Flack III, MD, David W. Deaton, MD, and Dipak K. Das, PhD

Myocardial Blood Flow during Early Postischemic Reperfusion: Effect of Ventricular Distension 237
Edward R. Ferguson, MD, Walter V. A. Vicente, MD, PhD, Russell D. Spruell, BSEE, C. Patrick Murrah, MD, and William L. Holman, MD, FACS

Nitric Oxide Mediates Myocardial Contractile and Electrophysiological Dysfunction during Early Cardiac Allograft Rejection 239
Neil K. Worrall, MD, Robert T. Pyo, BA, Darren G. Alexander, BA, Thomas P. Misko, PhD, W. Douglas Lazenby, MD, and T. Bruce Ferguson, Jr., MD, FACS

Mixed Xenogeneic Chimerism (Mouse + Rat → Mouse) Induces Cellular and Humoral Tolerance for Primarily Vascularized Cardiac Allografts 241
Yolonda L. Colson, MD, PhD, Kathy J. Zadach, and Suzanne T. Ildstad, MD, FACS

The Effects of Double Strain Intrathymic Inoculation on Tolerance Induction to Experimental Cardiac Allografts 244
Hitoshi Yokoyama, MD, PhD, Charles Goldstein, MD, Zhenya Shen, MD, Muhammad Mohiuddin, MD, and Verdi J. DiSesa, MD, FACS

Fetal and Neonatal Recipients Reject Discordant Cardiac Xenografts: Mechanism of Hyperacute Rejection by Alternate Pathway Complement Activation 246
Hiranya A. Rajasinghe, MD, V. Mohan Reddy, MD, Wayne W. Hancock, MD, PhD, John R. Liddicoat, MD, Mohamed H. Sayegh, MD, and Frank L. Hanley, MD

Right Ventricular Performance and Pulmonary Arterial Coupling Improve following Lung Transplantation in Pulmonary Hypertension 248
Osvaldo Juniti Yano, MD, Marc Louis Dickstein, MD, Daniel Burkhoff, MD, PhD, Takushi Kohmoto, MD, Robin Baradarian, BA, Joseph DeRose, MD, Henry Michael Spotnitz, MD, FACS, and Craig Richey Smith, MD, FACS

Myocardial Function in Hearts Overexpressing β-Adrenergic Receptors 251
Hartmuth B. Bittner, MD, PhD, Edward P. Chen, MD, Carmelo A. Milano, MD, Shankha S. Biswas, BS, Robert D. Davis, MD, and Peter Van Trigt, MD

Effects of Singlet Oxygen and Its Scavenger (Tryptophan) on Bioenergetics and the Recovery of the Ischemic Myocardium 254
Fady S. Wanna, MD, Victor D. Schepkin, PhD, J. Nilas Young, MD, FACS, Thomas F. Budinger, MD, and William M. DeCampli, MD, PhD, FACS

Genetic Engineering of Vein Grafts Resistant to Failure: Mechanism of Anti-Atherogenic Effect 258
Michael J. Mann, MD, Gary H. Gibbons, MD, and Victor J. Dzau, MD

Satellite Cells for Repair and Regeneration of Injured Myocardium 260
Race L. Kao, PhD, and William Browder, MD, FACS

Pulmonary Selectivity of Inhaled Nitric Oxide in a Chronic Canine Model of Dilated Cardiomyopathy 262
David J. Polidori, MD, Francis V. DiPierro, MD, Edward B. Lankford, MD, PhD, Elana Doering, MD, PhD, C. William Hanson, MD, Timothy J. Gardner, MD, FACS, Evan Loh, MD, and Michael A. Acker, MD, FACS

Mechanism of Cardiomyoplasty: Comparison of Left versus Right Cardiomyoplasty Using Three-Dimensional Tagged Magnetic Resonance Reconstruction in a Canine Model of Chronic Heart Failure 265
Peter W. Cho, MD, Malcolm V. Brock, MD, Christopher C. Moore, BSE, Elliot R. McVeigh, PhD, Joshua E. Tsitlik, PhD, and Michael A. Acker, MD

The Tension–Length Relationship in Trained Latissimus Dorsi Muscle 269
David B. Lautz, MD, Brian J. deGuzman, MD, Frederick Y. Chen, SM, Rashid M. Ahmad, MD, Rita G. Laurence, BS, and Lawrence H. Cohn, MD, FACS

Hypoxia-induced Ventricular Ectopy Is Increased by Supplementing Myocardial Adenosine 272
Richard J. Leone, Jr., MD, PhD, and Gary F. Merrill, PhD

Respiratory Interventions in an Animal Model of the Univentricular Heart: Effects on Oxygen Delivery and Means of Monitoring Outcomes 274
Christopher J. Riordan, MD, Flemming Randsbaek, MS, John H. Storey, MD, William D. Montgomery, BS, William P. Santamore, PhD, and Erle H. Austin III, MD, FACS

Continuous Hypothermic Retrograde Cerebral Perfusion Improves Cerebral Postischemic Reperfusion following Circulatory Arrest during Aortic Arch Surgery 277
Christopher L. Wixon, MD, Clay M. Burnett, MD, Robert M. Lust, PhD, You Su Sun, MD, Christian Mann, MD, and W. Randolph Chitwood, Jr., MD, FACS

Leukodepletion and Its Effect upon Complement Activation and Neutrophil Degranulation during Right Ventricular Assistance 280
Steven F. Johnson, MD, Robin G. Sutton, MS, Hong Zhu, BS, Alphonse DeLucia III, MD, and Wayne E. Richenbacher, MD, FACS

Advanced Mathematical Models of the Heart for Clinical Applications 283
Stephen W. Downing, MD, Michael J. Moulton, MD, Lawrence L. Creswell, MD, Barna A. Szabo, PhD, and Michael K. Pasque, MD, FACS

Cyclic AMP and Myocardial Function in the Postischemic Neonatal Heart 286
Ara K. Pridjian, MD, Jawed Alam, PhD, Cheri L. Touchard, BS, Clifford H. Van Meter, MD, P. Michael McFadden, MD, and John L. Ochsner, MD, FACS

Regional Pulsatile Hemodynamic Response to Cyclic GMP (cGMP) in the Neonatal and Infant Pig Pulmonary Arterial Circulation 289
Jeff L. Myers, MD, Maria T. Pettit, BS, Patrick W. Domkowski, PhD, Peter C. Kouretas, MD, Ann Marie Yu, BS, John T. Cockerham, MD, Adam K. Myers, PhD, Felicia L. Geas, MS, Yining Wang, MD, and Richard A. Hopkins, MD, FACS

Selective Brain Cooling 292
Aqeel A. Sandhu, MD, Arthur E. Schwartz, MD, J. Gilbert Stone, MD, A. Donald Finck, MD, Pawel Kwiatkowski, MD, Linda Mongero, CCP, and Robert E. Michler, MD, FACS

Procollagen Gene Expression in Experimental Aortic Valve Grafts 295
Ying C. Song, MB, PhD, Lena Y. Yao, PhD, James M. Kneebone, MS, and Flavian M. Lupinetti, MD, FACS

Alterations of the Native Protamine Molecule Protect against the Negative Effects on Myocyte Contractile Function 298
R. Barry Hird, MD, Blanding Jones, BS, Rupak Mukherjee, MS, Thomas W. Wakefield, MD, Philip C. Andrews, PhD, Fred A. Crawford, MD, FACS, and Francis G. Spinale, MD, PhD

Preservation of Placental Function after Cardiopulmonary Bypass in Fetal Sheep Using Extracorporeal Oxygenation 301
David D. Yuh, MD, Kimberly L. Gandy, MD, Jesse Gutierrez, and Robert C. Robbins, MD

Isolated Lung Perfusion with Herpes Simplex Virus–Tumor Necrosis Factor Alpha Produces Isolated Organ Gene Transfer, High Local TNF-α Concentrations, and Is Effective against Metastatic Sarcoma in the Rat 304
Jennifer Ellis, MD, Howard Federoff, MD, PhD, Michael Brownlee, MD, Yuman Fong, MD, and Michael Burt, MD, PhD, FACS

Regulatory Role of IL-10 in Rat Lung Ischemia–Reperfusion Injury 306
Michael J. Eppinger, MD, G. Michael Deeb, MD, FACS, Steven F. Bolling, MD, FACS, and Peter A. Ward, MD

Adenosine Diminishes Ischemia–Reperfusion-induced Lung Injury 309
Mayilone Arumugasamy, MD, Cathal Kelly, FRCSI, Mary Barry, FRCSI, Paul Redmond, FRCSI, and David Bouchier-Hayes, FRCSI, FACS

Mitigation of Ischemia–Reperfusion Injury in ICAM-1 Knockout Mice 312
Marc L. Schermerhorn, MD, David P. Nelson, MD, PhD, Min Xiao, MD, Paul R. Hickey, MD, Ellis Neufeld, MD, and John E. Mayer, MD

Neutrophil Protease Inhibitor Improves Pulmonary Function during Reperfusion after 18 Hours of Preservation 314
Oliver A. R. Binns, MD, Nuno F. de Lima, MD, Scott A. Buchanan, MD, Michael C. Mauney, MD, Jeff T. Cope, MD, Stephen D. Thies, MD, Charles D. Goff, MD, R. Scott Corbin, MD, Kimberly S. Shockey, MS, Curtis G. Tribble, MD, FACS, and Irving L. Kron, MD, FACS

The Respiratory Burst in Rat Alveolar Macrophages Is Attenuated after Displacement of Phospholipid Arachidonic Acid by *n*-3 Fatty Acids in Vivo 316
John Palombo, DSc, Erin Lydon, BS, Amy Imrich, BS, Lester Kobzik, MD, Bruce Bistrian, MD, PhD, and R. Armour Forse, MD, PhD, FACS

Lymphoscintigraphic Technique to Image Canine Esophageal Lymph Nodes 319
Michael Shane McNevin, MD, Jaroslaw Muz, MD, Ron Ferris, Janet Thorne, Shashi Madan, MD, and Frank A. Baciewicz, Jr., MD

Amelioration of ARDS in Isolated Blood-perfused Rat Lungs: Effects of Hemofiltration and Exchange Transfusion as Therapeutic Interventions 320
Tsukasa Miyatake, MD, PhD, James D. McCully, PhD, and Joseph LoCicero III, MD, FACS

Measurement of Oxygen Free Radicals in a Rabbit Shock Lung Model: Effect of Superoxide Dismutase and Vitamin A 323
Shyamal Premaratne, MD, PhD, Wei Zhang, MD, Cynthia H. Tinsley, MD, Larry R. Tinsley, MD, and J. Judson McNamara, MD, FACS, FACC

Inducible Nitric Oxide Synthase Expression Is Associated with an Inhibition of Vascular Smooth Muscle Growth in Arterial Segments following Balloon Angioplasty 326
Larry L. Shears II, MD, Edith Tzeng, MD, Simon Watkins, PhD, Richard L. Simmons, MD, and Timothy R. Billiar, MD

Extracorporeal Circulation with Exogenous Antithrombin III and Low-Dose Heparin 328
Kevin H. T. Teoh, MD, MSc, FRCS(C), Edward Young, PhD, Henry Wood, and Jack Hirsh, MD, FRCP(C)

Chapter VII—Vascular

Effect of Graded Exercise on Aortic Wall Shear Stress 331
Charles A. Taylor, MS, Bradford I. Tropea, MD,
Thomas J. R. Hughes, PhD, and Christopher K. Zarins, MD

Low Diurnal Heart Rate Variability Inhibits Experimental Carotid Stenosis 334
Hisham S. Bassiouny, MD, FACS, Daniel C. Lee, BS,
Christopher K. Zarins, MD, FACS, and Seymour Glagov, MD

Cyclical Strain Activates Mitogen-activated Protein Kinase (MAPK) in Bovine Aortic Endothelial Cells 336
Chittoor B. Sai Sudhakar, MD, FRCS, and
Bauer E. Sumpio, MD, PhD

Partial Purification and Characterization of an Endogenous Inhibitor of cGMP-dependent Protein Kinase 338
Colleen M. Brophy, MD, Shannon Lamb, BS,
Howard Rasmussen, MD, PhD, and
James R. Goldenring, MD, PhD

Prevention of Atherosclerosis via Adenoviral-mediated Gene Replacement in apoE-deficient Mice 341
Vikram S. Kashyap, MD, Silvia Santamarina-Fojo, MD, PhD,
David R. Brown, MD, PhD, Deborah Applebaum-Bowden, PhD,
Susan Meyn, BS, Catherine Parrott, BS, Beverly Paigen, PhD,
Nobuyo Maeda, PhD, and H. Bryan Brewer, Jr., MD

Antisense Oligonucleotide to Proto-Oncogene c-*myb* Inhibits the Formation of Intimal Hyperplasia in Experimental Vein Grafts ... 342
Gregory J. Fulton, MB, FRCSI,
Mark G. Davies, MD, PhD, FRCSI, and Per-Otto Hagen, PhD

Inhibition of Vascular Smooth Muscle Proliferation with Inducible Nitric Oxide Synthase Gene Transfer 345
Edith Tzeng, MD, Sothi D. Tran, MS, Bruce R. Pitt, PhD, David A. Geller, MD, Richard L. Simmons, MD, FACS, and Timothy R. Billiar, MD

Immune Modulation of Adenovirus-mediated Vascular Gene Transfer 347
Andrew H. Schulick, MD, Jeffrey J. Rade, MD, and David A. Dichek, MD

Antisense Oligonucleotides against FGFR-1, Tenascin, and Osteopontin Inhibit Canine Vein Graft Myointimal Hyperplasia .. 349
Mark K. Hirko, MD, Steven S. Kang, MD, Larry Denner, PhD, Dewei Ren, MD, Ajay A. Rege, PhD, Claire Gosselin, MD, Pete Lin, MD, Dae Un Kim, MD, Suzanne G. Eskin, PhD, and Howard P. Greisler, MD, FACS

Transforming Growth Factor-β_1 Increases Lysyl Oxidase Activity in Rat Vascular Smooth Muscle Cells in Vitro 352
Charles J. Shanley, MD, Rajabrata Sarkar, MD, Theodore H. Welling, BS, Andrew Kriegel, MD, and James C. Stanley, MD, FACS

Polyamine Inhibition Modifies Extracellular Matrix Deposition ... 354
Eric D. Endean, MD, FACS, David W. Lipke, PhD, Shewan M. Aziz, PhD, Gloria L. Gellin, MS, and Michael J. Buckmaster, MD

Photodynamic Therapy Alters Extracellular Matrix: Differential Modulation of Vascular Cell Function 358
Farzin Adili, MD, Seth J. Karp, MD, Mabel Chang, BA, Randolph G. S. van Eps, MD, Michael T. Watkins, MD, FACS, and Glenn M. LaMuraglia, MD, FACS

Tumor Necrosis Factor-α (TNF-α), Interleukin-1β (IL-1β), and Interleukin-8 (IL-8) Are Released following Thoracoabdominal Aneurysm Repair and TNF-α Levels Are Related to Patient Outcome 360
Timothy R. S. Harward, MD, FACS, Tomas D. Martin, MD, M. Burress Welborn III, MD, Hester S. A. Oldenburg, MD, Wade Douglas, MD, N. Joseph Espat, MD, Lyle L. Moldawer, PhD, Edward M. Copeland III, MD, FACS, and James M. Seeger, MD, FACS

Plasminogen Activators Are Elevated in Diseased Aorta 362
Paula K. Shireman, MD, Walter J. McCarthy, MD, William H. Pearce, MD, and Hau C. Kwaan, MD

Expression of the Major Histocompatibility Complex (MHC) Class II (DR) Antigen by Smooth Muscle Cells of the Media of Abdominal Aortic Aneurysms 365
Tomasz A. Kosierkiewicz, MD, Joseph F. Capella, MD, Nancy X. Yin, MD, and M. David Tilson, MD, FACS

Human Macrophage Products Inhibit Human Arterial Smooth Muscle Cell Proliferation and Down-Regulate 1α(I) Procollagen Expression 367
Brian G. Halloran, MD, Byung J. So, MD, Janet J. Grange, MD, and B. Timothy Baxter, MD, FACS

Increased Susceptibility of Endovascular Grafts to Infection: A Comparison of Endovascular and Standard Grafts 370
Richard E. Parsons, MD, Luis A. Sanchez, MD, Michael L. Marin, MD, Karen A. Holbrook, MD, Peter L. Faries, MD, Franklin D. Lowy, MD, and Frank J. Veith, MD, FACS

Intra-Arterial Stented Grafts: The Effect of Intraluminal Placement on Prosthetic Graft Healing 373
Mark P. Ombrellaro, MD, Scott L. Stevens, MD, Michael B. Freeman, MD, FACS, and Mitchell H. Goldman, MD, FACS

Cigarette Smoke Exposure Injures Arterial Endothelium 377
David K. Traul, MD, Julie A. Freischlag, MD, FACS, Philip C. Chiang, MD, Curtis A. Erickson, MD, Robert A. Cambria, MD, Gary R. Seabrook, MD, FACS, and Jonathan B. Towne, MD, FACS

Immobilized Immunoglobulin, through Its Interaction with the Platelet FcγRII Receptor, Can Trigger Thrombosis 380
Ernest M. Ginalis, MD, Louis DiFazio, MD, Cathy Regan, MD, Ping Ji, MS, Ralph S. Greco, MD, FACS, and Beatrice Haimovich, PhD

Increased Urokinase Receptor Expression in Proliferating Vascular Smooth Muscle Cells and in Arterialized Vein Grafts in Rabbits 384
Michael A. Golden, MD, FACS, Katalin Kariko, PhD, Mary L. David, BS, S. Steve Okada, MD, Abigail K. Hanna, MD, and Elliot S. Barnathan, MD

The Role of Intracellular Calcium in Migration of Human Vascular Smooth Muscle Cells 386
Shinji Yamamura, MD, Peter R. Nelson, MD, and K. Craig Kent, MD, FACS

Local Application of Tissue Factor Pathway Inhibitor (TFPI) Inhibits Intimal Hyperplasia Induced by Arterial Interventions 389
Roger K. Khouri, MD, FACS, David M. Brown, MD, Eric T. Choi, MD, Norbert M. Kania, MD, E. Neil Pasia, BA, and Laurent A. Lantieri, MD

Chapter VIII—Transplantation

Human Monocytes Activate Porcine Aortic Endothelial Cells and May Potentiate Transplantation Rejection in This Species Combination 392
Maria T. Millan, MD, Christiane Ferran, MD, PhD, Karl M. Stuhlmeier, PhD, Carolyn Geczy, PhD, and Fritz H. Bach, MD

The Role of Macrophages in Delayed Vascular Xenograft Rejection 396
Jonathan Fryer, MD, MS, FRCSC, Sally Chen, BS, Pamela Simone, BS, and Arthur Matas, MD, FACS

Cytokine Patterns in Chronic Rejection: Renal Allografts with Long-Term Treatment of CyA, RS61443, and γ-Lactone 398
Kari C. Nadeau, MD, PhD, Haruhito Azuma, MD, and Nicholas L. Tilney, MD, FACS, FRCS

Differential Cellular Localization of Inducible Nitric Oxide Synthase mRNA in Acute Rejection of Vascularized Allografts .. 400
Paul C. Kuo, MD, Edward J. Alfrey, MD, Nancy R. Krieger, MD, Phil Huie, MS, Richard K. Sibley, MD, and Donald C. Dafoe, MD, FACS

The Selective and Inducible Ablation of IL-2-Producing Cells in Vivo 403
Wendy-Ann Olivier, MD, Simon R. Carding, PhD, and John Rombeau, MD, FACS

Optimal CTLA4 Ig Inhibition in Different Rat Allo Strain Combinations 405
Atiq Rehman, MD, Peter S. Linsley, PhD, and M. Wayne Flye, MD, PhD, FACS

Accessory Molecule Expression on CD8+ T Cells Infiltrating Renal Allografts 408
L. Thomas Chin, MD, Stephen T. Bartlett, MD, and Gregg A. Hadley, PhD

Anti-CD3-mediated Enhancement of in Vivo-generated Allogeneic Cytotoxicity 411
Mark D. Pescovitz, MD, FACS, and Benita K. Book, MS

The Role of the Thymus in Inducing Tolerance to Tissue-specific Antigens—A Transgenic Mouse Model 414
Ryutaro Hirose, MD, Kathleen Smith, and Douglas Hanahan, PhD

Analysis of a Functional Role for Chimerism in CTLA4-Ig Plus Bone Marrow-treated Cardiac Allograft Recipients 416
Diane Z. Alexander, MD, Thomas C. Pearson, MD, DPhil, Rose Hendrix, Shannon Ritchie, Peter Linsley, PhD, and Christian P. Larsen, MD, DPhil

Metabolic, Hemodynamic, and Intracranial Pressure and Cerebral Perfusion Pressure Changes in Anhepatic and Ischemic Liver Failure Animals 419
Michael F. McGrath, MD, Jacek Rozga, MD, PhD, Lawrence B. Kong, MD, and Achilles A. Demetriou, MD, PhD, FACS

Segmental Small Intestinal Transplantation in the Pig: A Model for Living Related Small Intestinal Transplantation 421
Martin Friedlich, MD, Shengtao Yao, MD, Robert Power, MB, BCh, FRCP, MRCPath, Norman Kneteman, MD, MSc, FACS, and David Sigalet, MD, MSc, PhD, FRCSC

Interleukin-7 Enhances the Generation of Human Cytotoxic T Lymphocytes against Epstein-Barr Virus-transformed Cell Lines: Implications for Adoptive Immunotherapy 423
Eamonn Coveney, MD, FRCSI, Bryan Clary, MD, Michelle Iacobucci, BS, Michael Morse, MD, and H. Kim Lyerly, MD

Down-Regulation of IFN-γ rather than IL-2 Gene Expression Is Associated with Prolonged Cardiac Allograft (Tx) Survival following Intrathymic Injection of Donor Cells in Sensitized Rats ... 426
Kazuhiko Onodera, MD, Jochen Binder, MD, Hans-Dieter Volk, MD, PhD, Wayne W. Hancock, MD, PhD, Mohamed H. Sayegh, MD, and Jerzy W. Kupiec-Weglinski, MD, PhD

In Vivo Blockade of Multiple Receptor-Ligand Pairs of the T-Cell Costimulatory Pathway CD28/CTLA4 Prolongs Allograft Survival Indefinitely ... 430
Kenneth D. Chavin, MD, PhD, Jennifer E. Woodward, MS, Allison L. Bayer, BS, Nasrin Nabavi, PhD, Jonathan S. Bromberg, MD, PhD, FACS, and Prabhakar Baliga, MD

Tolerance Induction to Cardiac Allografts by Sequential Intrathymic Inoculation of Disparate Alloantigens ... 432
Kazuyuki Shimomura, MD, Mark A. Hardy, MD, FACS, and Soji F. Oluwole, MD, FACS

CD2 Monoclonal Antibodies Induce Antigen-Specific Tolerance ... 435
Sandip Kapur, MD, Ashwani Khanna, PhD, Vijay Sharma, PhD, Baogui Li, PhD, Rudy Haschemeyer, PhD, William Stubenbord, MD, FACS, Albert Rubin, MD, Kurt Stenzel, MD, and Manikam Suthanthiran, MD

Adenoviral-mediated Gene Transfer of TGF-β1 and vIL-10 Promotes Long-Term Survival of Islet Allografts ... 438
James K. Min, BA, Abraham Shaked, MD, PhD, FACS, Steven Raper, MD, FACS, Clyde F. Barker, MD, FACS, and Ali Naji, MD, FACS

Early Predictors of Rejection in Small Bowel Transplantation: The Role of Tissue Messenger RNA Coding for Cytokines ... 441
Jose R. Nery, MD, Jose Casella, MD, Silvio Tucci, Jr., MD, Phillip Ruiz, MD, PhD, Werviston L. Faria, MD, Leslie Olson, BA, Joel Szust, DVM, Debbie Weppler, MSN, Keith Zucker, PhD, Andreas Tzakis, MD, FACS, and Joshua Miller, MD, FACS

Mice Transplanted with Allogeneic Fetal Liver Stem Cells and Adult Facilitating Cells Demonstrate Multilineage Chimerism 444
Barbara A. Gaines, MD, Yolonda L. Colson, MD, PhD, Christina L. Kaufman, PhD, and Suzanne T. Ildstad, MD, FACS

MHC Class II Antigen Effect on Tolerance in a Rat Cardiac Allograft Model 447
Yolanda T. Becker, MD, Robert H. Blanton, MD, PhD, H. Keith Johnson, MD, Robert E. Richie, MD, FACS, and Harold C. Miller, PhD

Peptide-mediated Immunosuppression: Effect of ALLOTRAP B7 on B- and T-Cell Function 450
Michael Hanaway, MD, Jue Wang, MD, Ed Geissler, PhD, Roland Buelow, PhD, and Stuart Knechtle, MD, FACS

Diastolic Properties during Rejection of the Heterotopically Transplanted Rat Heart 452
Pablo F. Soto, MD, Chao-Xiang Jia, MD, Yvonne M. Carter, MD, Joanne P. Starr, MD, Mehrdad R. M. Amirhamzeh, MD, and Henry M. Spotnitz, MD, FACS

Pathogenesis and Treatment of Obliterative Airway Disease after Heterotopic Tracheal Allograft and Xenograft Transplantation 456
Hermann Reichenspurner, MD, PhD, Xinfan Huang, MD, Vipal Soni, Randi Shorthouse, Gerald J. Berry, MD, and Randall E. Morris, MD

Chapter IX—*Oncology*

Treatment of Established Murine Tumor Metastases by Immunization with Recombinant Adenovirus Encoding a Model Tumor Antigen 459
Pauline W. Chen, MD, Michael Wang, BA, Vincenzo Bronte, MD, Yifan Zhai, MD, PhD, Kari Irvine, PhD, Steven A. Rosenberg, MD, PhD, and Nicholas P. Restifo, MD

Gene Delivery and Expression by Nonreplicating, Noncytolytic Recombinant Vaccinia Virus 462
John H. Yim, MD, Walter Marti, MD, Kangla Tsung, PhD, and Jeffrey A. Norton, MD, FACS

Comparison of Cytokines Secreted by B16-BL6 in Mediating Tumor Immunity 465
Marjorie J. Arca, MD, John C. Krauss, MD, Scott E. Strome, MD, and Alfred E. Chang, MD, FACS

Pulmonary Surfactant Protein—A Gene Promoter Directs Specific Gene Expression in Lung Cancer Cell Lines 468
David L. Crooks, MD, Michael J. Campbell, PhD, and John E. Niederhuber, MD, FACS

Growth Suppression of a Human Breast Carcinoma in Vivo and Inhibition of Angiogenesis in Vivo by the Endogenous Estrogen Metabolite 2-Methoxyestradiol 470
Nancy Klauber, MD, Sareh Parangi, MD, Ernest Hamel, MD, PhD, and Robert J. D'Amato, MD, PhD

Investigation of *src*-related Signaling Pathways in Colonic Neoplasia 473
Donald T. Hess, Jr., MD, Kimberly M. Rieger, PhD, David Shibata, MD, Ian C. Summerhayes, PhD, and Glenn Steele, Jr., MD, PhD, FACS

Efficient Gene Delivery to Malignant Cells by a Conjugated Adenovirus/DNA Complex 475
Dao Nguyen, MD, MSc, FRCSC, Sandra Wiehle, BS, Richard Cristiano, PhD, and Jack A. Roth, MD, FACS

IGF-1 Receptor Antisense Gene Therapy in Mesothelioma 478
Daphne J. Y. Mew, MD, PhD, FRCS, Jessica Donington, MD, Cheryl Walker, PhD, Renato Baserga, MD, Michele Carbone, MD, and Harvey I. Pass, MD, FACS

Immunization with Recombinant Vaccinia Virus Encoding the Costimulatory Molecules B7-1 and/or B7-2 and a Model Tumor Antigen Mediates Tumor Regression and Prolongs Survival 483
Ronald S. Chamberlain, MD, MPA, Miles W. Carroll, PhD, Vincenzo Bronte, MD, Paul Spiess, Patrick Hwu, MD, Steve Warren, Bernard Moss, MD, PhD, Steven A. Rosenberg, MD, PhD, FACS, and Nicholas P. Restifo, MD

Isolation and Characterization of Novel Genes with Elevated Expression in Pancreatic Cancer 485
Paul L. Baron, MD, FACS, Michael W. Graber, MD, Clifford W. Schweinfest, PhD, Takis S. Papas, PhD, and Dennis K. Watson, PhD

Modulation of β1 Integrin Gene Expression with De Novo-transcribed Antisense RNA 488
Daniel Herz, MD, Deepak Narayan, MD, Young Han, PhD, Ravi Goel, BS, Rajan Puri, and Thanjavur Ravikumar, MD, FACS

IL-1α Acts Directly on Hypothalamic VMH to Mediate Cancer Anorexia 491
Alessandro Laviano, MD, Michael M. Meguid, MD, PhD, FACS, Tad Renvyle, MS, Elizabeth I. Opara, PhD, Zhong-Jin Yang, MD, and Filippo Rossi Fanelli, MD

Replication Errors and MLH1 Mutations in Sporadic Colorectal Cancer 493
Giuseppe Gagliardi, MD, John Bracamontes, BS, Ira J. Kodner, MD, FACS, Paul J. Goodfellow, PhD, Alison Whelan, MD, and Jeffrey F. Moley, MD, FACS

T Cells Isolated from Breast Cancer Patients Recognize a HER2/neu-derived Tumor-associated Antigen Shared by Several Epithelial-based Tumors 496
David C. Linehan, MD, Peter S. Goedegebuure, PhD, George E. Peoples, MD, and Timothy J. Eberlein, MD

Mechanism of CD44H-mediated Reduction in Colon Carcinoma Growth 498
Kazuhisa Takahashi, MD, PhD, Ivan Stamenkovic, MD, Michael Cutler, BS, and Kenneth K. Tanabe, MD

Tumor Necrosis Factor (TNF-α) Induces the Expression of Angiogenic Factors in Human Colorectal Carcinoma 501
Hui Yuan, MD, Mary Matli, BS, and Robert S. Warren, MD, FACS

Melanoma-induced Macrophage Dysfunction 505
Hassan A. Naama, FRCS, FRCSI, Arnold D. K. Hill, FRCSI, Jian Shou, MD, Steve E. Calvano, PhD, and John M. Daly, MD, FACS

Apoptosis (Programmed Cell Death) Is Induced with Differentiation and Growth Arrest in a Human Colon Cancer by a Bcl-2-independent Mechanism 507
Mariangela Mancini, MD, Philip B. Paty, MD, David Hockenbery, MD, Michael D. Lieberman, MD, and Benjamin O. Anderson, MD

Bone-Metastatic Breast Carcinoma (BRCa) Cell Growth Is Selectively Enhanced by Human Bone Marrow-conditioned Medium (BM-CM) 509
Edna M. Mora, MD, Phillip G. Cavanaugh, PhD, Toshiyuki Yoneda, PhD, and Garth L. Nicolson, PhD

Modulation of Doxorubicin-induced Apoptosis in Breast Cancer Cells by Tamoxifen or Verapamil 512
Roger R. Perry, MD, FACS, and Yuan Kang, MD, PhD

GM-CSF-Producing Recombinant Vaccinia Generate Antitumor Immunity and Inhibit Growth of Established Murine Pancreas Cancer 515
Gary R. Peplinksi, MD, Kangla Tsung, PhD, and Jeffrey A. Norton, MD, FACS

A Novel Human Tumor Necrosis Factor (TNF)-α Mutant That Binds Exclusively to the p75 TNF-α Receptor Stimulates T-Cell Proliferation But Does Not Produce Toxicity in the Baboon 517
M. Burress Welborn III, MD, Kimberly Van Zee, MD, Paul D. Edwards, MD, Jeffrey H. Pruitt, MD, Stephen F. Lowry, MD, Hansreuder Loetscher, PhD, Werner Lesslauer, MD, PhD, Jean-Nicolas Vauthey, MD, and Lyle L. Moldawer, PhD

In Vivo-directed Enzyme Prodrug Gene Therapy for Human Pancreatic Cancer 520
Bryan Clary, MD, Eamonn Coveney, MD, FRCSI, Dan G. Blazer III, BS, J. Michael DiMaio, MD, Dan Via, MD, Michael Morse, MD, and H. Kim Lyerly, MD

High Dose Tumor Necrosis Factor Administered in Isolated Limb Perfusion Leads to 97% Response Rate in Advanced Soft Tissue Sarcoma 523
Dina Lev, MD, Subhi Abu-Abid, MD, Moshe Inbar, MD, Isaac Meller, MD, Samario Chaitchik, MD, Arie Merhav, MD, FACS, Joseph M. Klausner, MD, and Mordechai Gutman, MD

Disruption of DCC Expression Results in the Acquisition of Metastatic Cell Behavior 526
David Shibata, MD, Kimberly M. Rieger, PhD, Donald T. Hess, MD, Ian C. Summerhayes, PhD, and Glenn Steele, Jr., MD, PhD, FACS

Successful Adoptive Immunotherapy (AIT) Is Dependent on the Infiltration of Host $CD8^+$ and $CD4^+$ T Cells into Tumor 528
Makoto Nagoshi, MD, Peter S. Goedegebuure, PhD, Ulrike L. Burger, MD, Maximilian P. Chang, BA, and Timothy J. Eberlein, MD, FACS

The Integrin $\alpha 6\beta 4$ Facilitates the Adhesion of Invasive Colorectal Cancer Cells 531
Celia Chao, MD, Astrid S. Clarke, BA, Glenn Steele, Jr., MD, PhD, FACS, and Arthur Mercurio, PhD

Allelic Loss on Chromosome 8p Occurs Early in the Development of Breast Carcinoma 533
Diane M. Radford, MD, FRCS(Edin), FACS, Matthew S. Holt, Jon H. Ritter, MD, Nancy J. Phillips, MD, Keri L. Fair, BA, Katherine DeSchryver, MD, Marlys E. Schuh, MD, FACS, and Helen R. Donis-Keller, PhD

Prognostic Significance of HLA-DR Antigen on Human Breast Cancer Cells and Surrounding Breast Tissue 536
Manoussos M. Konstadoulakis, MD, Michael P. Vezeridis, MD, FACS, Frank Cannizzo, Jr., MD, PhD, Basil C. Golematis, MD, FACS, Kirby I. Bland, MD, FACS, and Harold J. Wanebo, MD, FACS

Tumor-Infiltrating Lymphocytes from Metastatic Melanoma Recognize Tumor Antigen-derived Peptides: A Clinical Study in a Series of Consecutive, Unselected HLA-A2-Positive Patients ... 539
Thomas M. Kocher, MD, Giulio C. Spagnoli, MD, Urs Luescher, MD, Markus Zuber, MD, Antonio Juretic, MD, PhD, Christoph Schaefer, PhD, Thomas Willimann, PhD, Felix Harder, MD, FACS, and Michael Heberer, MD

An Experimental Model in Mice Simulating Tumor Recurrence in Colonic Anastomosis 541
Alexander Shnaper, MD, Joseph Yossiphov, MD, Arie Merhav, MD, FACS, and Micha Y. Rabau, MD

Correlation of Interferon Regulatory Factors 1 and 2 (IRF-1 and -2): Expression and Murine Tumor Growth in the Presence of Interferon-γ 544
Gerard M. Doherty, MD, Brenda McCluskey, BA, Kangla Tsung, PhD, and Jeffrey A. Norton, MD, FACS

Glutamine Regulates DNA and Protein Biosynthesis in a Human Colon Cancer Cell Line 546
Masafumi Wasa, MD, Steven F. Abcouwer, PhD, and Wiley W. Souba, MD, ScD, FACS

Chapter X—Gynecology and Obstetrics

Evidence of Induction of Nitric Oxide Synthase during a Normal Physiological Process 550
Eileen S. Natuzzi, MS, MD, Michael R. Harrison, MD, FACS, and Robert K. Riemer, PhD

TGF-β1 Interaction with CSF-1: Induction of Nitric Oxide Synthase Activity in Primary Mouse Uterine Myocytes 552
Eileen S. Natuzzi, MS, MD, Michael R. Harrison, MD, FACS, and Robert K. Riemer, PhD

Oligohydramnios Does Not Alter Myometrial Response to Cholinergic Stimuli 555
Mary C. Santos, MD, Louise Strande, MS, and Edward J. Doolin, MD, FACS

Cervical Sonomicrometry Detects Preterm Labor 557
John F. Bealer, MD, Erik D. Skarsgard, MD,
Thomas L. Toth, MD, David L. Gibbs, MD,
N. Scott Adzick, MD, FACS, and
Michael R. Harrison, MD, FACS

Mechanism of Estrogen-induced Salt and Water Retention 560
Brian McNamara, BSc, MB, John Cuffe, BSc,
Gerald O'Sullivan, MB, MSc, MCh, FRCS, and
Brian J. Harvey, DSc, PhD

Prenatal Diagnosis of Cleft Lip and Palate 563
Marc H. Hedrick, MD, Leslie Montgomery, MD,
William Y. Hoffman, MD, Michael R. Harrison, MD, FACS,
and Michael T. Longaker, MD

Intestinal Obstruction Due to Advanced Ovarian Cancer:
Results of Surgical Intervention 564
Christopher J. Bartels, MD, Eddie Reed, MD, and
William F. Sindelar, MD, FACS

Chapter XI—Neurological Surgery

Combining Ultraprofound Hypothermia with Blood Substitution
Facilitates Resuscitation from Hemorrhagic Shock 567
Julian E. Bailes, MD, Amr M. Elrifai, MD,
Michael J. Taylor, PhD, Shou-Ren Shih, MD,
Daniel M. Simon, MD, and Daniel L. Diamond, MD

Hemodilution with Diaspirin-Cross-linked Hemoglobin Lowers
Intracranial Pressure, Improves Cerebral Perfusion Pressure, and
Reduces Fluid Requirement following Head Injury and Shock 569
James E. Chappell, MD, Whitney J. McBride, MD, and
Steven R. Shackford, MD, FACS

Increased Pleural Pressure Mediates the Effects of Elevated Intra-Abdominal Pressure upon the Central Nervous and Cardiovascular Systems 572
Geoffrey L. Bloomfield, MD, Philip C. Ridings, MD, FRCS, Charles R. Blocher, BS, and Harvey J. Sugerman, MD, FACS

Temporal Lobe Ischemia and Epileptogenicity: Long-Term Cortical Cerebral Blood Flow Analysis of Sequential Seizures 574
Martin E. Weinand, MD, Waleed F. El-Saadany, MD, L. Philip Carter, MD, FACS, David M. Labiner, MD, Kalarickal J. Oommen, MD, Dinesh Talwar, MD, and Geoffrey L. Ahern, MD, PhD

Adverse Effects of Albuterol Sulfate on Intracranial Pressure in Patients with Traumatic Brain Injuries 575
Larry Weber, RRT, J. Adair Prall, MD, Philip Goodman, RRT, and John S. Nichols, MD, PhD

Neurotoxicity of Polyamines and Neuroprotective Effects of Aminoguanidine 578
Kevin M. Cockroft, MD, Malcolm Meistrell III, BA, Anthony Cerami, PhD, and Kevin J. Tracey, MD

Reduction of Mechanonociceptive and Thermonociceptive Responses by Intrathecal Administration of Glycine and Related Compounds 581
Richard K. Simpson, Jr., MD, PhD, Claudia S. Robertson, MD, and J. Clay Goodman, MD

Increased Immunolocalization of FGF Receptors in Fusing Rat and Human Cranial Sutures 583
Jamie P. Levine, MD, James P. Bradley, MD, Joanne J. Sung, BS, Sabina Werner, PhD, Leslie I. Gold, PhD, and Michael T. Longaker, MD

Chapter XII—Orthopaedic Surgery

Effects of Dose and Administration Methods on Antithrombotic Function of Enoxaparin 587
Anastasios V. Korompilias, MD, PhD, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

In Situ Generation of Vascularized Joint Replacements 589
David M. Brown, MD, Sang Hun Chung, MD, Laurent A. Lantieri, MD, Norbert M. Kania, MD, Jacqueline C. Hodge, MD, Michael W. Vannier, MD, and Roger K. Khouri, MD, FACS

Reliability of the Proximally Based Soleus Muscle Flaps for Distal Tibial Coverage: Anatomic Study 593
Sai S. Ramasastry, MD, FRCS, Krishna Narayanan, MD, Stan Monstrey, MD, and Marc D. Liang

High-Pressure Irrigation Destroys Cellular Architecture and Causes Progressive Necrosis of Skeletal Muscle and High Levels of Tumor Necrosis Factor 595
Khashayar Salartash, MD, Charles Hewitt, PhD, Laura Lee, MD, Serge Foley, BS, Christopher Born, MD, and William De Long, MD

Immediate Effect of Hypothermic Storage at 4°C and 10°C on the Function of Skeletal Muscle 597
Michael P. Bolognesi, MSI, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

The Role of TNF-α in Functional Recovery of Injured Peripheral Nerve 599
Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

The Efficacy of Ischemic Preconditioning of Skeletal Muscle Depends on the Number of Preconditioning Cycles 601
Lorenz Gürke, MD, Axel Marx, MD, Paul-Martin Sutter, MD, Thomas Salm, MD, Felix Harder, MD, FACS, and Michael Heberer, MD

Influence of Skeletal Muscle Architecture on Contractile Properties after Tenotomy or Myotomy 603
Kotaro Yoshimura, MD, John A. Faulkner, PhD, and William M. Kuzon, Jr., MD, PhD, FRCS(C)

The in Vitro Characterization of Alternative Cell Sources in Meniscal Tissue Engineering and Their Potential Use in Vivo 606
William Ertl, MD, Carl Paulino, BS, Ryhana Manji, BA, and Daniel Grande, PhD

Evaluation of an Acute Active Muscle Strain Injury Using a Physiologic Injury Model 609
Greg A. Erens, George C. Hughes, MD, Anthony V. Seaber, and William E. Garrett, Jr., MD, PhD

Preliminary Observations of the Effect of Diabetes Mellitus on Nerve Regeneration 611
Srdan Babovic, MD, Andrew Ress, MD, A. Lee Dellon, MD, FACS, and Michael F. Angel, MD, FACS

The Role of Antioxidant 21-Aminosteroids in Peripheral Nerve Crush Injury 613
Rima M. Nasser, BA, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

Chapter XIII—Outcomes and Quality of Life

A Neural Network Predicts the Emergency Room Disposition of Trauma Patients 616
Seth D. Izenberg, MD, FACS, Mark D. Williams, MD, Diantha D. Miller, RN, and Arnold Luterman, MD, FACS

Outcomes Assessment in Common General Surgical Conditions 618
Richard E. Burney, MD, FACS, Katherine R. Jones, RN, PhD, Jane Wilson Coon, RN, DNSc, and Darby K. Blewitt, RN, MS

Treatment of Velopharyngeal Dysfunction with Palatal Lift Prostheses: An Outcome Analysis 621
Peter D. Witt, MD, FACS, Arlene A. Rozzelle, MD, Jeffrey L. Marsh, MD, Lynn Marty-Grames, CCC-SLP, Harlan R. Muntz, MD, W. Donald Gay, DDS, and Thomas K. Pilgram, PhD

The Outcome and Significance of Preoperative Hemoglobin (Hb) and Hematocrit (Hct) Demonstrated by Invasive Monitoring 623
Charles S. La Punzina, MD, Nanakram Agarwal, MD, FACS, John A. Savino, MD, FACS, and Louis R. M. Del Guercio, MD, FACS

Efficacy of Stereotactic Needle Biopsy in the Evaluation of Mammographic Abnormalities 625
Brian Pitre, MD, Paul L. Baron, MD, FACS, Lisa F. Baron, MD, Jeffrey M. Lafond, MD, Paul H. O'Brien, MD, FACS, and David J. Cole, MD

Correlation of Stereotactic Core Breast Biopsy with Open Biopsy—A Study of 102 Patients 628
Philip Iorianni, MD, FACS, Alana La Grenade, MD, FCAP, Helen Barr, MD, and Darrell B. Manning, MD, FACS

Combined Management of Bitable Frontal Sinus Fractures 630
Paul K. Ratzker, MD, Vyasa Ramcharan, DDS,
Stuart Kline, DDS, and Philip Villanueva, MD

Necrotizing Fasciitis: A Retrospective Review of 122
Consecutive Cases 631
Ben Jason Childers, MD, Ryan Nachreiner, BS,
Douglas L. Hendricks, MD, FACS, Frank Rogers, MD, FACS,
and Robert A. Hardesty, MD, FACS

The Impact of Airbags on Facial Trauma 633
Gregory L. Borah, MD, DMD, FACS, Philip D. Wey, MD,
Gregory J. Bauer, MD, and Jeffrey S. Hammond, MD, FACS

Comparative Study Evaluating Surgical Telescopes (Loupes)
and the Operative Microscope for Microvascular Repair 636
Miguel L. Gallegos, MD, Amado Ruiz-Razura, MD, and
Benjamin E. Cohen, MD, FACS

Locally Advanced Breast Cancer: A New Therapeutic Approach 638
C. A. Portera, Jr., MD, R. P. Compton, MD,
J. W. Battle, MD, FACS, D. C. Tabor, MD, and
I. W. Browder, MD, FACS

Chapter XIV—Pediatric Surgery

The Role of Nitric Oxide in the Pathogenesis of Necrotizing
Enterocolitis 642
Henri R. Ford, MD, Kimberly K. Reblock, RN,
Christina Teramana, BS, Simon Watkins, PhD,
Mark L. Wulkan, MD, Walid A. Abou-Jaoude, MD, and
Marc I. Rowe, MD, FACS

Expression of Alternatively Spliced Fibronectin mRNA during Fetal Wound Healing 644
David J. Whitby, MD, Michael T. Longaker, MD, Lawrence Brown, MD, and Livingston Van De Water, PhD

Immunohistochemical Localization of TGF-β1, -β2, and -β3 Isoforms during Fetal Wound Healing 646
John W. Siebert, MD, Joanne J. Sung, BS, Jonathan Zirn, MD, Hideko Kamino, MD, Mark H. Hedrick, MD, N. Scott Adzick, MD, FACS, Leslie I. Gold, PhD, and Michael T. Longaker, MD

A Comparison of Adenoviral and Retroviral Gene Transfer into the Small Intestine 649
Thomas E. Hamilton, MD, Ronald P. DeMatteo, MD, John L. Rombeau, MD, FACS, and Steven E. Raper, MD, FACS

In Utero Gene Therapy 650
Steven W. Bruch, MD, Guanghuan Tu, MD, Denny Liggitt, MD, Andrea Metkus, MD, George Mychaliska, MD, Michael R. Harrison, MD, FACS, Robert Debs, MD, and Karin Gaensler, MD

Dexamethasone Increases Expression of Surfactant-associated Protein mRNA in Rats with Nitrofen-induced Congenital Diaphragmatic Hernia 654
Holly L. Hedrick, MD, Bella A. Pacheco, MD, Paul D. Losty, MD, Kenneth D. Bloch, MD, Patricia K. Donahoe, MD, FACS, and Jay J. Schnitzer, MD, PhD

Heterotopic Fetal Rat Hepatocyte Transplantation on Biodegradable Polymers 658
Robert A. Cusick, MD, Kaoru Sano, MD, Hanmin Lee, MD, Joerg M. Pollok, MD, David Mooney, PhD, Robert Langer, ScD, and Joseph P. Vacanti, MD

Taurine Protects against Sodium Arsenite-induced Human Endothelial Cell Apoptosis 661
Jiang Huai Wang, MD, PhD, H. Paul Redmond, FRCSI, R. William G. Watson, PhD, Claire Condron, BSc, and David Bouchier-Hayes, FRCSI

Regional Blood Flow Response to Epinephrine Infusion in Normovolemic and Hypovolemic Piglets 664
Dave L. Bigam, MD, BMSc, Dennis W. Jirsch, MD, MSc, PhD, FRCSC, Keith J. Barrington, MB, ChB, FRCPC, and Po-Yin Cheung, MBBS

Continuous Intrapulmonary Distention with Perfluorocarbon Accelerates Postnatal Lung Growth: Possible Application for Congenital Diaphragmatic Hernia 666
Dario O. Fauza, MD, John W. DiFiore, MD, Michael H. Hines, MD, James C. Fackler, MD, Richard Slavin, RRT, Ronald Hirschl, MD, and Jay M. Wilson, MD, FACS

Perfluorocarbon Partial Liquid Ventilation Improves Gas Exchange while Augmenting Decreased Functional Residual Capacity in an Animal Model of Acute Lung Injury 669
Paul G. Gauger, MD, Michael C. Overbeck, BS, Sean D. Chambers, BSE, and Ronald B. Hirschl, MD, FACS

Selective Cytotoxicity of a Genetically Engineered IL-2–Ricin Fusion Toxin to Tumor Cells Bearing the IL-2 Receptor 672
Edward P. Tagge, MD, FACS, John C. Chandler, MD, Derya U. Tagge, MD, Chris Burbage, Greg Hancock, Joseph Vesely, Mark Willingham, MD, and Arthur E. Frankel, MD

Chapter XV—Plastic Surgery

The Effect of Oxygen Tension on Insulin-Like Growth Factor Production by Fibroblasts 676
Gracie-Ann Dinkins, MD, Heinz Scheuenstuhl, AB, M. Zamir Hussain, PhD, E. M. Spencer, MD, and Thomas K. Hunt, MD, FACS

Differential Fibroblast Chemotaxis in Fetal, Neonatal, and Adult Cell Lines in Response to TGF-β1 and Fetal Bovine Serum 679
Kevin P. Moriarty, MD, and Timothy M. Crombleholme, MD

Temporally Variable Induction of Homeobox Gene D11 during Wound Repair in the Fetal Mouse Limb 682
Rahul K. Nath, MD, John Jensen, MD, MA, and Paul M. Weeks, MD, FACS

Prostaglandins in Fetal Rat Wound Healing 685
Melissa A. Johnson, MD, Kenna S. Given, MD, and XiaoXing Gao, PhD

Effects of Conditioned Medium from Activated Monocytes on Collagen Metabolism of Adult Rabbit Fibroblasts 687
Oluyinka O. Olutoye, MD, Dorne R. Yager, PhD, Eleanor J. Barone, MD, Robert F. Diegelmann, PhD, and I. Kelman Cohen, MD, FACS

Failure of the Fetal Sciatic Nerve to Regenerate at Midgestation 689
Claudia Meuli-Simmen, MD, Martin Meuli, MD, Charles D. Yingling, PhD, Kathleen McBiles Hoffman, DVM, Thomas Eiman, MD, Harry J. Buncke, MD, William Lineaweaver, MD, Michael R. Harrison, MD, FACS, and N. Scott Adzick, MD, FACS

In Vivo Gene Transfer with PDGF-A and -B Plasmids to Partial Thickness Porcine Skin Wounds 692
Thomas Winkler, MD, Jaromir Slama, MS, Tor Svensjö, MS, Christoph Andree, MD, Michael D. Macklin, William F. Swain, PhD, and Elof Eriksson, MD, PhD, FACS

Keratinocyte Membrane Fatty Acid Composition Alters Histamine-induced Calcium Signaling 695
Leslie V. Cohen, MD, Beth C. Kimball, MD, Michael W. Mulholland, MD, PhD, FACS, and Cynthia L. Marcelo, PhD

Gene Transfer during Lower Extremity Replantation 698
Detlev Hebebrand, MD, Kenneth E. Drazan, MD, Abraham Shaked, MD, PhD, FACS, and Neil F. Jones, MD, FACS

Cutaneous Gene Expression after Local DNA Delivery 701
Martin Meuli, MD, Yong Liu, MD, Denny Liggitt, DVM, PhD, Claudia Meuli-Simmen, MD, Sharon Knauer, Michael R. Harrison, MD, FACS, N. Scott Adzick, MD, FACS, and Robert J. Debs, MD

In Vivo Gene Transfer with Microseeding 702
Jaromir Slama, MS, Christoph Andree, MD, Tor Svensjö, MS, Thomas Winkler, MD, William F. Swain, PhD, Michael D. Macklin, and Elof Eriksson, MD, PhD, FACS

Dura Mater-Suture Paracrine Signaling during Cranial Suture Fusion: IGF-I, IGF-II in Situ Hybridization and IGF-I, Osteocalcin Immunolocalization in Human and Rat Cranial Sutures 706
Victor K. Han, MD, James P. Bradley, MD, Douglas A. Roth, MD, Jamie P. Levine, MD, Joseph G. McCarthy, MD, and Michael T. Longaker, MD

Alloplastic Augmentation of the Temporal Fossa 709
Charles A. Messa, MD, Scott P. Bartlett, MD, and Linton A. Whitaker, MD

Negatively Charged Beads and TGF-β_1 Promote Healing in Calvarial Defects 711
W. Glenn Lyle, MD, David J. Simmons, PhD, and Martin C. Robson, MD, FACS

Sucralfate Inhibits Intestinal Mucosal Wound Healing in a Cell Culture Model 714
Sandeep Datta, MD, Nancy J. Emenaker, PhD, RD, and Marc D. Basson, MD, PhD

Prolonged Collagenase Activity Is Associated with Delayed Wound Healing and Decreased Collagen Deposition in Rat Flap Wounds ... 716
Daniel A. Schwarz, MD, Judy Thul, BS, William J. Lindblad, PhD, and Riley S. Rees, MD

Treatment of Ischemia–Reperfusion Injury by Monoclonal Antibody to Intercellular Adhesion Molecule-1 720
Yasuyoshi Tosa, MD, PhD, W. P. Andrew Lee, MD, Nikiforos Kollias, PhD, Rene Casanova, MD, Mark A. Randolph, MAS, and James W. May, Jr., MD

Magnetic Resonance Imaging Can Be Used as a Monitoring Device to Detect Vascular Occlusion of a Muscle Flap in a Rabbit Animal Model and Is More Reliable Than a Thermocoupler 722
Gordon K. Lee, BS, Feng Zhang, MD, PhD, King Li, MD, William C. Lineaweaver, MD, and Kenneth Hui, MD

Microarteriole Vasoconstriction Reduces Functional Blood Flow to Ischemic Muscle during Reperfusion 725
William A. Zamboni, MD

Tissue Factor Pathway Inhibitor Enhancement of Skeletal Muscle Viability following Ischemia 728
Edward W. Ferguson, MD, Basem Koudsi, MD, Gary Miller, MD, Kurt Merkel, MD, Tze-Chein Wun, PhD, Fang Xu, MD, and Bruce A. Kraemer, MD, FACS

Vascular Delay Improves Latissimus Dorsi Muscle Perfusion and Muscle Function for Use in Cardiomyoplasty 730
Sean M. Carroll, FRCSI, Steven Heilman, MS, Richard W. Stremel, PhD, John H. Barker, MD, PhD, and Gordon R. Tobin, MD, FACS

Leukemia Inhibitory Factor (LIF) Enhances Peripheral Nerve Regeneration 732
R. Rob Donato, MB, BS, Surindar Cheema, PhD, David Finkelstein, PhD, Perry Bartlett, PhD, Peter G. Hayward, MB, BS, FRACS, FRCS(I), and Wayne A. Morrison, MD, BS, FRACS

The Effect of Thermal Injury on Local Wound Production of Interferon-γ, Tumor Necrosis Factor-α, and Interleukin-10 735
C. Scott Hultman, MD, Lena M. Napolitano, MD, Cara Campbell, BS, Suzan deSerres, BA, and Anthony A. Meyer, MD, PhD, FACS

The Effects of Tissue Factor Pathway Inhibitor (TFPI) on Tissue Ischemia and Reperfusion in a Rabbit Ear Model 738
Bruce A. Kraemer, MD, FACS, Chester D. Yu, Richard L. Ornberg, PhD, Tze-Chein Wun, PhD, and Basem Koudsi, MD

Stretch Stimulates Human Keratinocyte But Not Dermal Fibroblast Proliferation 740
Carlos E. Rivas-Gotz, MD, Michael Centrella, PhD, and Bauer E. Sumpio, MD, PhD, FACS

Structural Effects of Insulin on Wound Healing 743
Edgar J. Pierre, MD, Robert E. Barrow, PhD, Yoichi Sakuri, MD, PhD, Robert R. Wolfe, PhD, and David N. Herndon, MD

Platelet-derived Growth Factor Is Localized Intracellularly and Released by Human Monocytes Adherent to Fibronectin and Collagen Type I 745
Ernest S. Chiu, MD, Elaine W. Raines, PhD, Michael T. Longaker, MD, and Russell Ross, PhD

Identification of a Macrophage Growth Factor in Wound Fluid ... 748
Wes J. Arlein, MD, Jeffry D. Shearer, MA, and Michael D. Caldwell, MD, PhD, FACS

Expression Patterns of IL-1 and TNF in Nonchronic and Chronic Human Wounds 751
Paul D. Freeswick, MD, Kokushi Yamasaki, MD, Simon C. Watkins, PhD, Timothy R. Billiar, MD, Marshall W. Webster, MD, and David L. Steed, MD

Quantitation of Inducible Nitric Oxide Synthase Gene Expression during Incisional Wound Healing 753
Michael R. Nill, MS, MD, Tatiana N. Oberyszyn, PhD, Mary S. Ross, BS, Andrew S. Oberyszyn, BS, Robert L. Ruberg, MD, and Fredika M. Robertson, PhD

Stimulation of Nitric Oxide Synthase Activity in Rats by the Wound Healing Agent Turmeric and Its Extracted Products 756
Paul Talbot, MD, R. Rajeswar-kanjik, PhD, Suman K. Das, MD, FACS, FRCSE, and Hari H. P. Cohly, PhD

Chapter XVI—Urology/Reproductive Biology

Gender Differences: Improved Immune Function in Females as Opposed to Decreased Immune Function in Males following Hemorrhagic Shock 758
Matthias W. Wichmann, MD, René Zellweger, MD, Alfred Ayala, PhD, Catherine M. DeMaso, MS, and Irshad H. Chaudry, PhD

Thermotolerance Protects Kidneys from Ischemia–Reperfusion-induced Injury 760
Karen Stokes, BAMod, Cathal Kelly, FRCSI, Hazem Abdih, LRCP, Paul Redmond, FRCSI, David Hickey, FRCSI, and David Bouchier-Hayes, FRCSI, FACS

Functional Classification of Muscarinic Receptor Subtypes in the Rat Urinary Bladder 762
Ira J. Kohn, MD, Alan S. Braverman, PhD, Michael R. Ruggieri, PhD, and Philip M. Hanno, MD, FACS

Evidence for a Role of Intracellular Calcium Storage and Release in Erectile Function 764
Gregory A. Broderick, MD, Niels Haugaard, PhD, Chaoliang Gong, MD, and Robert M. Levin, PhD

Specific Changes in the Organization of the 5S rDNA Loop Domains during Differentiation 767
W. Steven Ward, PhD, Bonnie Nadel, Joy de Lara, and Kenneth B. Cummings, MD, FACS

Identification of Proteins That Interact with the Von Hippel-Lindau (VHL) Tumor Suppressor Gene Product 768
Adam S. Kibel, MD, Othon Iliopoulos, MD, Jerome P. Richie, MD, FACS, and William G. Kaelin, MD

Differential Expression of Transcriptional Regulatory Genes in Invasive and Noninvasive Renal Cell Carcinoma: A Possible Orchestrating Gene for Tumor Cell Invasion and Immunotherapy Resistance 771
Eric H. Thall, MD, Yongli Chang, BA, Michael J. Droller, MD, FACS, and Brian C.-S. Liu, PhD

Antitumor Effect of Intravesical Angiogenesis Inhibitor AGM 1470 on Rat Urinary Bladder Carcinoma Induced by *N*-butyl-*N*-(4-hydroxybutyl) Nitrosamine (BBN) 774
Shuichi Osawa, MD, Yasunori Terashima, MD, PhD, Jun Watanabe, MD, and Masao Akimoto, MD

DNA Transfer from One Human Prostate Cancer Cell to Another 776
Michael Tarlowe, Gene Meisenberg, MD, W. Steven Ward, PhD, and Kenneth B. Cummings, MD, FACS

Activation of a Novel ser/thr Protein Kinase in TNF-α-induced Apoptosis of Human Prostatic Carcinoma LNCap Cells 778
Mitsuhiro Sato, MD, Jerome P. Richie, MD, FACS, and Michael L. Lu, PhD

The Androgen Receptor Regulates Expression of Epidermal Growth Factor Receptor and Binding Affinity in the PC3 Cell Line 780
Daniel B. Rukstalis, MD, John Barnard, PhD, and Abraham L. Brass

The Role of CD44 Isoforms on Cellular Adhesion of Human Prostate Cancer Cell Lines 782
Tomas L. Griebling, MD, and Michael B. Cohen, MD

The Interferon Inducer Bropirimine Complements Prostatectomy in an Orthotopic Animal Model 785
James Brown, MD, David DiDomenico, MD, Michael Shaw, MS, Marvin Rubenstein, PhD, and Patrick Guinan, MD, FACS

Bone Extracellular Matrix Induces the Expression of Homeobox Genes in Prostate Cancer: Possible Mechanism for Androgen-independent Growth 787
Steven E. Robbins, MD, Wei-Ping Shu, MS, Yongli Chang, BA, Michael J. Droller, MD, FACS, and Brian C.-S. Liu, PhD
